

HELLO EVERYONE,
LET'S PLAY A GAME

Theme : spy hunter

HOW TO PLAY?

Gear up for an adventure
through the cyber maze!

01.

Use arrow keys to move and
collect keys

02.

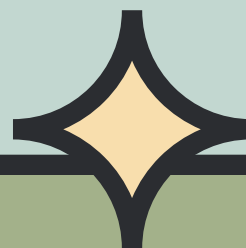

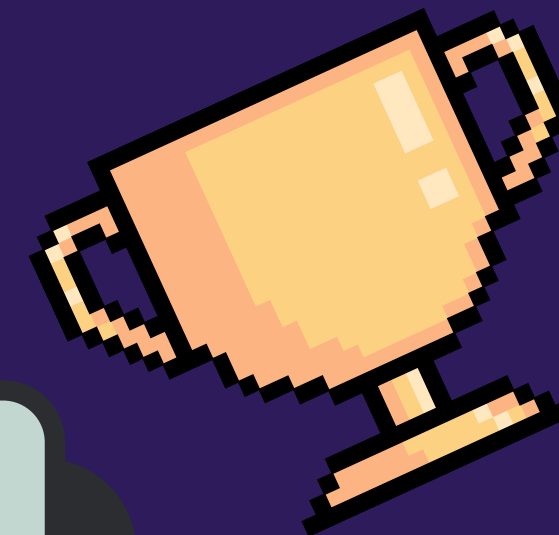

Avoid malware to protect your
health

03.

Unlock the file to complete the level

THE CODEBREAKER CHALLENGE

KEYS

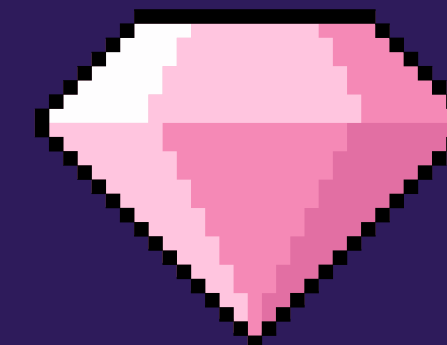

Collect keys to decrypt the locked file, just like real world encryption

LOCKED FILE

represents encrypted data, inaccessible without the right keys

UNLOCKING THE LOCK

symbolizes successful decryption to access critical
information

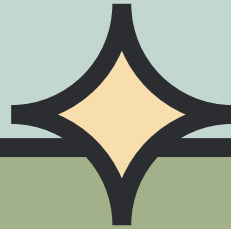

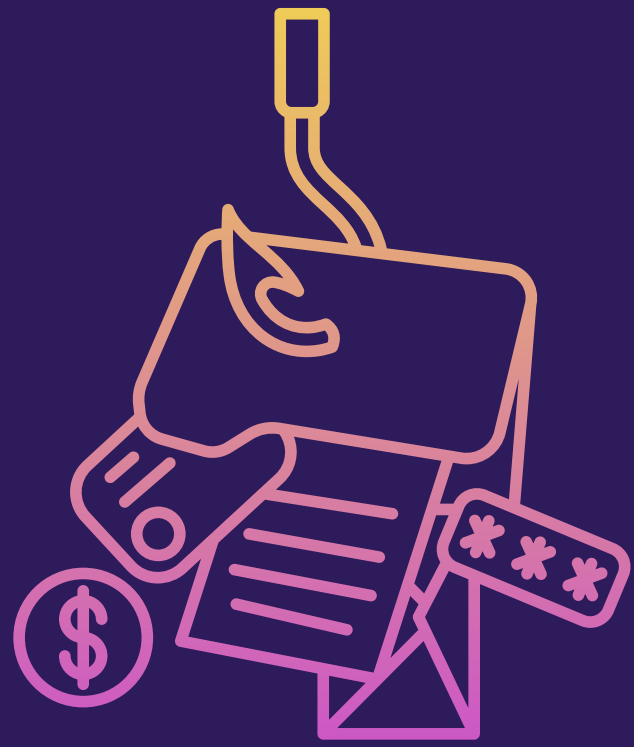

LEVEL UP!

what awaits you in the cyber maze

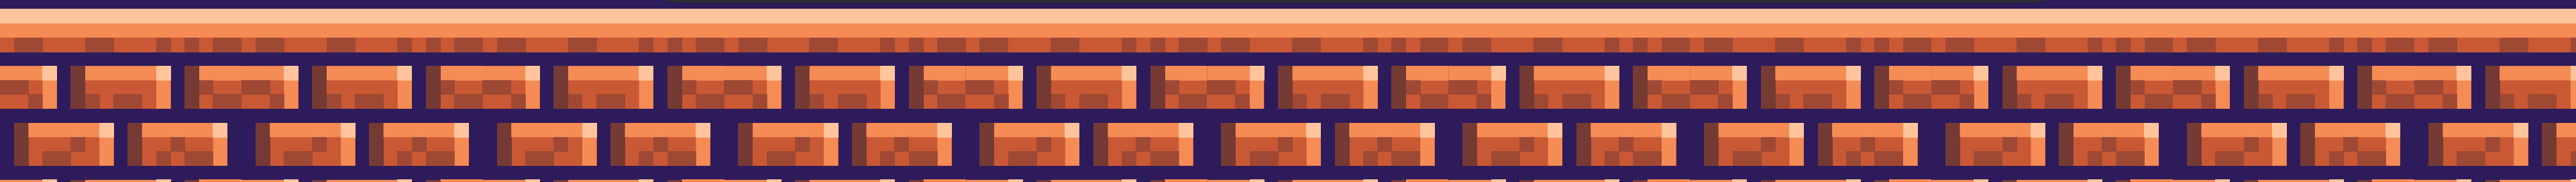

1. levels increase complexity
2. complete levels efficiently to earn rewards
3. use firewalls to protect your system

BEWARE OF PHISHING TRAPS

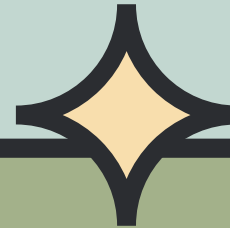

1. Fake keys mimic real ones but harm you when collected

2. Avoid phishing traps by carefully observing and verifying before collecting.

RANSOMWARE REALITY

- 
1. Ransomware in-game freezes your character temporarily.
 2. Escape by using a key or patch to regain control.
 3. Simulates real-world scenarios where ransomware locks your files.

4.

LESSONS FROM CYBER ATTACKS

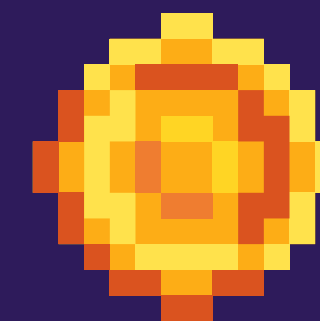

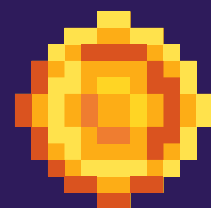

1. Phishing emails: Verify before clickingfake keys can harm your progress.
2. Ransomware: Stay prepared with defenses (keys/patches).
3. Cyber awareness is your strongest weapon, both in the game and in real life

CONCLUSION

Through gameplay, you've learned key lessons in identifying threats, staying alert, and defending against attacks.

Every level completed is a step toward mastering cybersecurity awareness

THANKYOU FOR
PLAYING
